Contact: Prof. Andrew H. Fagg (fagg@ou.edu)

Artificial Intelligence and Machine Learning (AI/ML) comprise a large set of computational techniques for autonomous prediction and decision making, and for using data to automatically construct models that make these possible. In the last several years, the confluence of standardized tools and high-powered computational hardware have made the process of constructing new models, even from large data sets, possible for many science/engineering laboratories and organizations. This convergence is fundamentally changing the way that science and engineering are done in many domains. The goal of this symposium is to bring together AI/ML scientists and practitioners, high-performance computing experts, domain scientists and engineers from the OU campuses, and corporate partners to discuss 1) current and new AI/ML tools and their use in solving research and applied problems, and 2) new opportunities for collaboration. The meeting will also include representatives from local companies that are doing work in the AI/ML area and who are seeking new collaboration opportunities and new recruits.

We expect over 130 OU faculty, researchers, staff and students to participate in this year's symposium. We invite you to join us for this exciting event for its second year.

Schedule Summary

- September 25:
  - Tutorials
  - Opening of the Predict-a-thon (a data driven prediction competition): student competitors only
- September 26: Industry Day
  - Talks by industry leaders
  - Technical talks by industrial representatives and students. Different sessions will focus on: Oil and Gas, Energy, Geosciences, Health, Meteorology, Retail and Aerospace
  - Predict-a-thon completion
- September 27: Research Day
  - Talks by faculty, researchers and students
  - Poster session
  - Research panel sessions

Participation Opportunities for Company Representatives

Participating as a company will give you an opportunity to interact with representatives from companies working in the AI/ML/Data Sciences domain, and with OU faculty, researchers, staff and students who are currently working in the AI/ML/Data Science domain and related application areas. Companies may send up to five representatives at no cost to any of the Symposium activities.

We ask that all participants register in the events which they plan to attend: http://ou.edu/coe/ai-ml

Becoming a Sponsor

Sponsorships help to support the AI/ML Symposium and related events, as well as scholarships for students working in the AI/ML area.   A sponsorship of $3000 affords:

- A six-minute presentation during the Industry Day lunch (available to the first seven confirmed sponsors)
- A corporate display and recruiting table
- Corporate branding on electronic and printed communications
- Symposium attendance by any number of registrants

You can submit your sponsorship online: https://forms.gle/a4LwnSidkiTmkMAU6
