

**University of Oklahoma**  
**College of Engineering**  
**School of Industrial and Systems Engineering**  
**Data Science and Analytics MS Program**

**ISE/DSA 5113: ADVANCED ANALYTICS AND METAHEURISTICS**

Spring 2021

T/R 1:15-2:30P Sarkeys M0207

**Instructor:** Charles Nicholson

**Email:** [cnicholson@ou.edu](mailto:cnicholson@ou.edu)

**Office:** Zoom (see announcements for link)

**Office hours:** Wed: 1-2:30p; Thu: 9:30-10:30a

**TA:** Rafia Bushra

**Email:** [rafia37@ou.edu](mailto:rafia37@ou.edu)

**Office:** Zoom (see announcements for link)

**Office hours:** Mon/Fri: 3:30 - 5:00p

**Course description:** Advanced Analytics and Metaheuristics explores and applies advanced techniques for addressing complex decision problems. Focus is on developing and employing problem solving strategies using advanced methods in the context of Data Science and Analytics. Topics include both continuous and combinatorial optimization with an emphasis on traditional techniques such as mathematical programming as well as modern heuristics such as simulated annealing, evolutionary algorithms, and swarm optimization. Students will use programming skills to implement algorithms and solve problems.

**Student outcomes:** Students will demonstrate competence in the following three areas:

- (1) Identification of pros/cons/issues in a variety of problem types and solution approaches
- (2) Collaborative development of solution strategies
- (3) Implementation of advanced analytics method to solve complex problems

**Textbooks:** We will use excerpts of several textbooks throughout the course – each is accessible for free for students currently enrolled at the University of Oklahoma.

Python IDE:	WingIDE	<a href="http://wingware.com/">http://wingware.com/</a>

**Grading Policy:**

All assignments must be uploaded to course platform by the due date and time indicated on the course website unless otherwise announced. Ensure your familiarity with the system in advance, and allot a sufficient amount of time for assignment submission *and any technical difficulties that may arise*. Assignments should be submitted in advance of an anticipated absence.

**Late assignments will be penalized.** See table for breakdown:

Submission is:	Maximum possible grade:
On time	100%
Up to 24 hours late	70%
More than 24 hours late	0%

Exam dates will be announced well in advance. Missing an exam without substantial PRIOR notification will result in a zero grade for that exam. **Late exams will not be accepted.**

**Slack day:** Each student will be allocated *one* slack day per semester. A slack day is a 24-hour extension for a homework assignment (not a project/quiz/exam/or other assessment task). The slack day may be invoked only once per student, but it may be used as the student sees fit. To invoke the slack day please provide a comment in the submission location when the work is submitted. Note: to invoke a slack day for any group assignment, all students in the group must have an available slack day to use.

**Grading Details:**

Percentages of course grading requirements are as follows:

- Homework.....50%**
- Exams.....35%**
- Participation.....15%**

The homework assignments will consist of a variety of written and programming problems. Students will program in AMPL and/or Python. Some homeworks may be assigned as team work (TBD).

The midterm exam is worth 15% and the final exam is worth 20% of the class grade. Exams will be *take-home exams* but must be completed entirely as individual work.

**Participation:** Online students are expected to view all videos. Campus students are expected to attend each class. All students are expected to complete the required readings and participate in the online discussions, quizzes, etc. Participation is evaluated and counts toward your final grade.

**Grading scale:** Total grade percentages in the following intervals result in the associated letter grade: [90-100] ← A, [80-90) ← B, [70,80) ← C, [60,70) ← D, [0,60) ← F .

*Grading discrepancy review:* Homework and exam grades can be reviewed and possibly revised if (i) a student requests a grade review, and (ii) requests are made **within one week** of the grade posting.

### Tentative Schedule:

Module	Week of	Unit	Notes	Due
<b>Problem Formulation and Exact Methods</b>	25-Jan	Problem Solving Mathematical optimization overview		Reading: HTSI, PO (see website for details)
	1-Feb	Intro to Linear Programming and AMPL Linear Programming Modeling		Reading: PO, AMPL <b>HW#1 (7-Feb @ 11:59 pm)</b>
	8-Feb	Linear Programming Modeling (continued)		Reading: PO, AMPL
	15-Feb	Network Flows		Reading: AMP, AMPL
	22-Feb	Network Flows (continued)		<b>HW#2 (28-Feb @ 11:59 pm)</b>
	1-Mar	Integer Programming	5-Mar instructional holiday	Reading: AMP
	8-Mar	Integer Programming		<b>HW#3 (15-Mar @ 11:59 pm)</b>
<b>The need for heuristics</b>	15-Mar	Branch-and-Bound / Algorithm Complexity	Mid-term exam	Reading: HTSI <b>Mid-term Exam (18/19-Mar) @ 11:59p</b>
<b>Metaheuristics</b>	22-Mar	Intro to heuristics Neighborhood-based heuristics		Reading: HTSI, HM
	29-Mar	Neighborhood-based heuristics (cont'd)		Reading: HM <b>HW#4 (4-Apr @ 11:59 pm)</b>
	5-Apr	Population-based heuristics: Genetic Algorithms	6-Apr instructional holiday	Reading: HM, "Metaphors Exposed"
	12-Apr	Population-based heuristics: PSO		Reading: HTSI, HM
	19-Apr	Population-based heuristics: ACO		<b>HW#5 (25-Apr @ 11:59 pm)</b>
	26-Apr	Multiple Objective Optimization and NSGA-II		Reading: HTSI, EAMOP
	3-May	Metaheuristic Multiple Objective Optimization: MOPSO		Reading: EAMOP <b>HW#6 (9-May @ 11:59 pm)</b>
	10-May	<b>Final Exam: Wednesday, 11-12 May @ 11:59p</b>		

**Required material:** There may be reading material, videos, or tutorials outside of the textbook and lectures. These supplemental items will help you learn vital skills such as AMPL, Python, or other relevant tools. Information regarding this material will be posted in the course website.

**Professional behavior:** While many of the tools necessary for the completion of this course will be discussed in the course content or via guided assignments, nevertheless considerable work outside of class in learning AMPL, Python or researching analytical techniques is expected if needed.

**Academic honesty:** Cheating, plagiarism, or any act of dishonesty will **NOT** be tolerated. This policy applies to all parties involved in the incident. Never take credit for anyone else's intellectual property, be it on an exam or homework assignment. **This includes, but is not limited to, copying from another student's paper, copying from a paper from a previous semester, using forbidden information on exams, and copying from published writings.** Students are responsible for knowing the requirements of the Academic Misconduct Code. Please see [http://integrity.ou.edu/students\\_guide.html](http://integrity.ou.edu/students_guide.html) for a student's guide to academic integrity. If you decide to cheat, please do not be surprised at the consequences.

### Reasonable accommodation policy

Students requiring academic accommodation should contact the Disability Resource Center for assistance at (405) 325-3852 or TDD: (405) 325-4173. For more information please see the Disability Resource Center website <http://www.ou.edu/drc/home.html>. Any student in this course who has a disability that may prevent him/her from fully demonstrating his/her abilities should contact me personally as soon as possible so we can discuss accommodations necessary to ensure full participation and facilitate your educational opportunities.

## **Title IX Resources and Reporting Requirement**

For any concerns regarding gender-based discrimination, sexual harassment, sexual assault, dating/domestic violence, or stalking, the University offers a variety of resources. To learn more or to report an incident, please contact the Sexual Misconduct Office at 405/325-2215 (8 to 5, M-F) or [smo@ou.edu](mailto:smo@ou.edu). Incidents can also be reported confidentially to OU Advocates at 405/615-0013 (phones are answered 24 hours a day, 7 days a week). Also, please be advised that a professor/GA/TA is required to report instances of sexual harassment, sexual assault, or discrimination to the Sexual Misconduct Office. Inquiries regarding non-discrimination policies may be directed to: Bobby J. Mason, University Equal Opportunity Officer and Title IX Coordinator at 405/325-3546 or [bjm@ou.edu](mailto:bjm@ou.edu). For more information, visit <http://www.ou.edu/eoo.html>.

## **Religious Observance**

It is the policy of the University to excuse the absences of students that result from religious observances and to reschedule examinations and additional required classwork that may fall on religious holidays, without penalty.

## **Adjustments for Pregnancy/Childbirth Related Issues**

Should you need modifications or adjustments to your course requirements because of documented pregnancy-related or childbirth-related issues, please contact your professor or the Disability Resource Center at 405/325-3852 as soon as possible. Also, see <http://www.ou.edu/eoo/faqs/pregnancy-faqs.html> for answers to commonly asked questions.

## **Final Exam Preparation Period**

Pre-finals week will be defined as the seven calendar days before the first day of finals. Faculty may cover new course material throughout this week. For specific provisions of the policy please refer to OU's Final Exam Preparation Period policy (<https://apps.hr.ou.edu/FacultyHandbook#4.10>).

## **Emergency Protocol**

During an emergency, there are official university procedures that will maximize your safety. Severe Weather: If you receive an OU Alert to seek refuge or hear a tornado siren that signals severe weather 1. LOOK for severe weather refuge location maps located inside most OU buildings near the entrances 2. SEEK refuge inside a building. Do not leave one building to seek shelter in another building that you deem safer. If outside, get into the nearest building. 3. GO to the building's severe weather refuge location. If you do not know where that is, go to the lowest level possible and seek refuge in an innermost room. Avoid outside doors and windows. 4. GET IN, GET DOWN, COVER UP. 5. WAIT for official notice to resume normal activities.

## **Armed Subject/Campus Intruder**

If you receive an OU Alert to shelter-in-place due to an active shooter or armed intruder situation or you hear what you perceive to be gunshots: 1. GET OUT: If you believe you can get out of the area WITHOUT encountering the armed individual, move quickly towards the nearest building exit, move away from the building, and call 911. 2. HIDE OUT: If you cannot flee, move to an area that can be locked or barricaded, turn off lights, silence devices, spread out, and formulate a plan of attack if the shooter enters the room. 3. TAKE OUT: As a last resort fight to defend yourself. For more information, visit <http://www.ou.edu/emergencypreparedness.html>

## **Fire Alarm/General Emergency**

If you receive an OU Alert that there is danger inside or near the building, or the fire alarm inside the building activates: 1. LEAVE the building. Do not use the elevators. 2. KNOW at least two building exits 3. ASSIST those that may need help 4. PROCEED to the emergency assembly area 5 ONCE safely outside, NOTIFY first responders of anyone that may still be inside building due to mobility issues. 6. WAIT for official notice before attempting to re-enter the building.

### **Mental Health Support Services**

If you are experiencing any mental health issues that are impacting your academic performance, counseling is available at the University Counseling Center (UCC). The Center is located on the second floor of the Goddard Health Center, at 620 Elm Rm. 201, Norman, OK 73019.

To schedule an appointment call (405) 325-2911. For more information please visit:

<http://www.ou.edu/ucc>

***All students are responsible for any changes/additions to this syllabus announced in class.***
