

OU Department of Economics BA+MA Program

<https://ou-public.courseleaf.com/dodge-arts-sciences/economics/economics-bachelor-arts-master-arts/checksheet-economics-bachelor-arts-master-arts.pdf>

For questions contact Economics undergraduate advisor: Corey Quiett cquiett@ou.edu

The Department of Economics offers an Accelerated Bachelor's + Master's Degree in Managerial Economics with a Big Data emphasis. This program is designed to be completed in 1-2 years, depending on full-time/part-time status, courses taken, pre-requisites, and scheduling.

This track provides rigorous training in economics and data analytics and is designed for students seeking jobs in either the private or public sectors. Please note that there is a 2-semester sequence of core classes that start in Fall, but it may be possible to join the program in the Spring semester.

Students are encouraged to apply to the program (initial departmental application, see "Application Requirements" below) by March 1st or as early as possible in their junior year.

This track requires both successful completion of **33 credit hours of coursework** as described below and maintain a **3.0 GPA in all courses**. The 33 hours include: 12 hours of shared* (BA+MA) Economics electives, 9 hours of core graduate Economics requirements, 3 hours of ECON 5940, and 12 hours of data analytics and related graduate electives.

**Please note these approved shared electives can only count toward the BA+MA program if they are taken DURING or AFTER the semester in which the student is accepted into the program by the department. Shared courses will count in both the Undergraduate and Graduate GPAs.*

Previous Coursework

Applicants must be in the junior or senior year of an economics degree in the College of Arts and Sciences to qualify. Some coursework in economics including both intermediate micro (3113) and macroeconomics (3133) is required prior to starting the program. All applicants need a good working knowledge of mathematics and basic statistics. At least two semesters of calculus and one semester of basic statistics (ECON 2843) or their equivalents are required. For Data elective courses, some knowledge of programming or advanced math/stats is helpful but not required.

Research Component

Students will enroll in ECON 5940 Research in Economic Problems (3-hour variable credit hour course) in their final semester, for which they may write and present a research paper. A faculty supervisor and committee for the paper must be arranged before a student can register for the course. From the degree check sheet:

"The combined BA/MA requires 12 hours of work (total of shared electives + 5940 course) shared between the Undergraduate and Graduate degrees so that students have 30 hours in their undergraduate major work, and also 30 or more hours of graduate work to apply towards the MA. If only 2 hours of ECON 5940 are taken, or if not all 9 hours of Economics electives are shared, additional graduate-level ECON electives not listed on this check sheet may be required."

Application Requirements

Students must have a 3.0 overall GPA to be considered for the program. The Department of Economics evaluates each applicant individually in order to select for admission those applicants who have the aptitude, scholarship, and analytical skill necessary to successfully complete an advanced degree. In order for the department to form an opinion about an applicant's aptitude, scholarship, and analytical ability, internal applicants (current OU ECON majors) should send the following to Tyler Ransom ransom@ou.edu

- 1) Transcripts from all previous coursework (can be unofficial)
- 2) Resume or CV—[see this site for guidance](#)
- 3) One-page statement of intent and purpose. Explain your journey and why you want to do this.
- 4) The names of a couple of professors in the OU Econ Department who are familiar with your work and can act as a reference for you

Once accepted to the program by the Department of Economics, submit your Change of Major with your undergraduate advisor to declare the accelerated program as your new major.

The complete timeline for the BA+MA paperwork is on the following page.

If you have questions about the Graduate College requirements, you can contact Graduate College Advisor Lincoln Torrey ltorrey1@ou.edu

Deadlines for Graduate College submissions can be found here:

<https://www.ou.edu/gradcollege/forms-and-policies/graduate-college-bulletin#info-masters-students>

*Once accepted into the program, you remain an undergraduate student. Although you can take graduate classes, and use the graduate student lounge, for administrative purposes you remain an undergraduate student until graduation. You are not eligible for GA positions or assistantships. See the full Graduate Bulletin here for more details: <https://www.ou.edu/gradcollege/forms-and-policies/graduate-college-bulletin>

Forms and Paperwork Timeline

Please ensure that you have the following information on file with the Department of Economics AND the OU Graduate College, per the noted timelines (click links to access the forms)

1. Upon acceptance to the BA+MA program by the Economics department, contact the undergraduate advisor (Corey Quiett) to **declare your new major** in the accelerated program
2. [Accelerated Degree Graduate Coursework Plan](#): This form details the 12 hours of shared coursework for your accelerated program. (9-10 hours ECON elective plus 2-3 hours ECON 5940 Research course). You must have this form signed by Dr. Firat Demir as the Graduate Liaison, as well as your undergraduate advisor (Corey Quiett), before submitting to the Graduate College. This should be submitted immediately after you have received department acceptance into the program and requested your major change.
3. [Addition or Change of Program Form](#): This is the online application for the Graduate portion of your degree program. This should be submitted to the Graduate College midway through the semester before the one in which you intend to graduate. For example, if you are graduating in May, you should submit this form by **September 15** in the previous year. If you are graduating in December, you should submit this form by **February 15**.
4. [Program of Study](#): This lists all of your BA+MA shared coursework, and all graduate-level classes. **Mark shared electives as "Shared" in the CREDIT* column on the form.** Graduate electives should be discussed and approved with the department, and the form must be signed by Dr. Firat Demir as the Graduate Liaison. Changes to the program of study (switching classes, substitutions, etc.) will require you to re-submit a new Program of Study form.
5. **BA/MA Research Course Form**: Available upon request from Corey Quiett. Required to be completed before you enroll in the ECON 5940 Research Course, detailing the course requirements and approved by the faculty supervisor. Complete and turn in after your enrollment window opens for your final semester.
6. **Authority Report Form**: This will be handled by Ms. Kelli Broome during the semester in which you complete your final coursework. Check with Ms. Broome that yours has been submitted.
7. **Non-thesis Examination/Research Paper**: To be completed during the semester in which you complete your final coursework; preferably completed and turned in by **December 1st** for Fall semester or **April 20th** for Spring semester.
8. [Apply for Graduation](#): Submit your graduation application for both the BA and the MA during the semester in which you complete your final coursework.

Pre-approved BA+MA Shared Electives and Graduate Electives

If you are seeking permission to use a course not noted on this list, please contact the department for approval and provide course syllabi in your request.

NOTE: There are 7 elective courses required for the degree program (3 shared and 4 graduate). Only 4 of these 7 courses (total of 12 credit hours) may be 4000-level or below, even if the course is approved for graduate credit. The rest must be 5000-level or above.

*The following ECON courses have been approved by the Department of Economics to be used as ECON electives for the BA+MA Program (Please note ECON 4970 is **NOT APPROVED**):*

4673 Money & Banking

4733 Middle East

4773 Game Theory

4513 Discrimination

4453 Urban Economics

5853 World Econ Dev

4223 Econometrics

4313 Industrial Organization

4523 Economics of Education

4353 Public Finance

The following Graduate-level courses have been approved by the Department of Economics to be used to satisfy the 12 hours of Graduate Elective credit for the BA+MA program. Permissions or overrides may be required by the departments offering the courses in order for BA+MA ECON students to enroll, and pre-requisite restrictions may apply; contact each department's advisor for further information.

--Contact Corey Quiett at cquiett@ou.edu for ECON overrides/permissions

Any 5000-level ECON course not reserved for PhD students (cannot use 5163, 5213, or 5313) if not used as shared electives or specific program requirements

*****IF A COURSE IS SLASH-LISTED, TAKE THE 5000-LEVEL OPTION*****
