We are excited to announce that the AAPG/SEG Spring EXPO will be held on March 10, 2017! We are utilizing the modified format, from last year, to a short course/networking/poster presentation event for one day only. We will be stressing to the students this is not a job fair, but a way for them to maintain contact with potential employers. However, should you decide to hold interviews, I would be happy to collect resumes and arrange for an interview room with OU Career Services.

Our student body is comprised of a diverse group of learners with strengths in math, science, and chemistry. We highly encourage our students to write and publish papers. Not only will our students be in attendance, but invitations have gone out to OSU, the University of Tulsa and schools from the AAPG Midcontinent Region. This event will be FREE for students to attend and as such, we are anticipating a well attended event.

We understand that budget constraints are upon us all, and as such, we are offering exhibit space at NO cost! This would include one table and two chairs.

The modified format will be:
- 8:30 – 2:00 – Short Courses
- 10:00 – 5:00 – Poster Presentations
- 5:00 – 7:00 – Awards & Social Event

Registration deadline is February 28, 2017.

Special sponsorship opportunities are available and I would be happy to discuss them with you.

We hope to see you all there!
Thank you all for your continued support!
