

Water Research Needs and Opportunities Through DEQ

Jay Wright

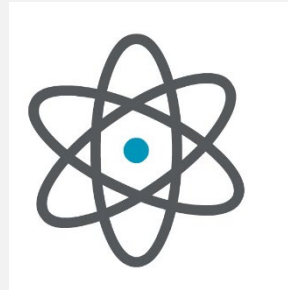

State Environmental Laboratory Services

DEQ is the state's primary environmental enforcement agency for drinking water, wastewater, hazardous waste, and air quality

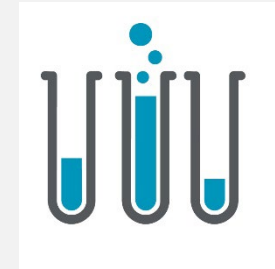

Land Protection Division

Hazardous Waste Releases
Superfund Sites
Groundwater contamination

State Environmental Laboratory

HABs
Fish Contaminants
Private Water

Water Quality Division

Public Water Supply
Municipal and Industrial Wastewater
Water Quality Planning

Environmental Complaints and Local Services

On-site Wastewater
Private water

Hazardous Waste

Groundwater

Low cost technologies for screening (remote sensing?) LNAPL and DNAPL plumes

Low cost cleanup technologies for groundwater plumes

Tar Creek Superfund Site

Mine Water Discharge

Sediment Removal

Stream Morphology

Fish Contaminants

Mercury source tracking, flux, bioavailability

HABs

Harmful Algal Blooms

Wastewater

Management techniques for reject water and wastes from treatment systems
