

Harry L. Blomquist, Jr. is president of Coastal States Gas Corporation, a large Houston-based independent energy company. He is also president of several Coastal States Gas Corporation Subsidiaries. Prior to October, 1975, Mr. Blomquist served as Coastal's executive vice president and as corporate director. He joined Coastal in 1966 as manager of production, following 14 years with Texaco, Inc., where he performed in various drilling and production engineering and supervisory positions. His last assignment with Texaco was as district engineer in charge of producing oil and gas wells in southern Louisiana. Within the Coastal Corporation, Mr. Blomquist has served as production manager, vice president of production, vice president, and senior vice president of exploration and production, followed by election to the board of directors and responsibilities as a major corporate officer. He holds a B.S. degree from the University of Texas. As a registered petroleum engineer, he is active in AIIME, Society of Petroleum Engineers, and is a member of the General Committee of the Division of Production of the American Petroleum Institute.

SECOND ANNUAL HARRY G. FAIR
MEMORIAL LECTURE

Each year, a special lecture is given in memory of Harry G. Fair, an outstanding OU alumnus. Harry G. Fair was born in Okmulgee, Oklahoma, on June 3, 1916. He received the B.S. in Chemical Engineering in 1939. He joined Phillips Petroleum Company in 1939 and worked his way up to Vice President for Supply and Transportation, with responsibility for world-wide exchange of crude oil and all transportation facilities. In 1966 he joined the M. W. Kellogg Company as Executive Vice President, in charge of all engineering activities and became Executive Vice President of Pullman, Inc., in 1968. He was President of Coastal States Gas Corporation from 1971 until the time of his death on July 27, 1974. Harry G. Fair was active in service to society and to his alma mater. He was a member of a number of professional societies and was a licensed professional engineer.

This lecture is made possible by the Harry G. Fair Memorial Fund contributed by his widow, Jane Swift Fair. Arrangements are made by the School of Chemical Engineering and Materials Science.
