VICE PRESIDENT FOR RESEARCH AND PARTNERSHIPS

FEATURED

Jenkins-Smith Shares Nuclear Energy Insights with CBS News

10-11:30 a.m. | June 28 | Scholars Lounge, Bizzell Library (LL2330)

Summer Grant Writers Group (Weekly)

Are you working on a grant proposal to fund your research or creative activity? Join the CFE Research and Creative Activities team for a weekly writing group to meet in the beautiful Scholars Lounge in the Lower Level of Bizzell Library. This writing group will offer quiet writing time, mutual accountability, and help navigating the complexities of solicitations from federal agencies and other funding sources. Members of the R&CA team will also be on hand to answer questions about grant-seeking and -writing. We encourage participants to register for the regular weekly sessions, although drop-ins are also very welcome.

1-2 p.m. | July 5 | Gallogly Hall, Room 325

Equipment Demonstration: Andor BC43 Benchtop Spinning Disk Inverted Confocal Microscope

This workshop, presented by Stefan Wilhelm, associate professor in the Stephenson School of Biomedical Engineering, aims to highlight the capabilities of OU COBRE's new shared imaging instrumentation available to the OU and OUHSC scientific community working in cancer research topics. Please join us to learn more about these powerful imaging technologies as well as to share your research interests and imaging technology needs.

Grant Seeking in the Arts & Humanities with Hanover Research

This training webinar, presented by CFE, provides an overview of grant writing essentials tailored to the needs of Arts and Humanities faculty with an overview of some key agencies and programs that fund work within the Arts and Humanities. Effective proposal development practices and common grant application components will also be discussed, as well as how to best approach the proposal writing process.
