

Coming Summer 2021 Master of Arts in Childhood Well-Being

The Importance of the Master of Arts in Childhood Well-Being

The National Kids Count Project develops and distributes data-driven reports on key areas of child and family well-being and demographic trends, including its annual KIDS COUNT Data Book. Regularly garnering national attention, these publications allow child and family advocates, practitioners, policymakers, public officials, and concerned citizens to focus on the needs of children and families, particularly those who are vulnerable and at risk for poor outcomes.

The Master of Arts in Childhood Well-Being is a 36-hour, non-thesis program that enables students to develop expertise in the areas examined in the trends outlined in the National Kids Count Project: education, health, family and community, and economic well-being. Thus, it provides a platform for a multidisciplinary view of holistic child well-being. This program also provides the learner with two electives that allow them to dig deeper into a specific content area.

The program will use a cohort model, meaning all students in the program will begin at the same time and take classes together. Most classes will be offered face-to-face in the evenings and some weekends, however some classes may be fully on-line or hybrid (mixture of synchronous and asynchronous). Once the program has been approved, classes will begin in summer 2021. This program does not require the GRE for entry.

The Master of Arts in Childhood Well-Being focuses on four broad themes as well as professional growth:

- **Education - 9 hours**
- **Health - 6 hours**
- **Family & Community - 6 hours**
- **Economic Well-Being - 6 hours**
- **Stats - 3 hours**
- **Electives - 6 hours**

Once approved, follow OU graduate admissions guidelines at ou.edu/admissions/apply/graduate
