

**Area: University of Oklahoma School of Community Medicine PA Program, Tulsa**  
**Title: Drug Screening Policy**

Drug Screening is required for OUHSC students/accepted applicants admitted to designated degree programs that include or may include a clinical component at a health care facility that uses drug screening as a condition of its affiliation with the University.

As applicable, students/accepted applicants who do not pass the drug screening may be unable to complete degree requirements or may be denied admission to or suspended or dismissed from the degree program.

The Tulsa PA Program includes testing at the time of provisional acceptance, as well as prior to the beginning of each academic year. See the policy for Drug Screening for Students Attending a Clinical Rotation Setting. The OU Tulsa PA Program requires repeat drug screening for a “negative dilute” result.
