DART Data Dictionary Subteam Minutes, 02-16-17

- HEDW Presentation on Business Glossary Software. David Wilkins showed a PowerPoint presentation given by Brenda Reeb at the 2013 Higher Education Data Warehouse Conference. The presentation highlighted software in the Business Glossary/Definition space, including candidates the Data Dictionary Subteam is interested in. Though the presentation is somewhat dated, the overview was good and some products appear to not have changed very much.
- David Wilkins shared that he had contacted OU IT about Informatica's capabilities for business definitions, including campus-wide use and collaboration. A meeting with OU IT will take place soon.
- David Wilkins shared that he had reached out to Collibra, and a conference call is set up with Collibra for the next Data Dictionary meeting on 3/2. This will be a 30-minute discovery conference call, which may lead to a demo over the web.
- The group spent the rest of the meeting developing questions for the Collibra phone call on 3/2/17.
- Next meeting: 3/2/17
