DART Data Dictionary Subteam Meeting Minutes, 02-20-20

- **Confidentiality and Deceased Indicators**—Recently it was discovered that guidance was needed for the Confidentiality Indicator (Directory Hold) and Deceased Indicator and their proper use in reporting. This team finished further polished a guidance document that will be shared at the next DART meeting, and eventually with report writers, new Cognos licensees, and posted on various websites. The team also reviewed the latest version of the GPA guidance document.

- **New Data Dictionary Entries**—David Wilkins created a list of tables lacking dictionary entries, and the team selected twelve tables to begin working on definitions. These will be done throughout the spring.

- **Other issues**—None were raised.
