

FALL 2019 OU PRESIDENTIAL DREAM COURSE PUBLIC LECTURE

How Weird! An Evolutionary Look at Modern Women's Lives

Bobbi S. Low
University of Michigan

7:00pm, September 24th
Sam Noble Museum Auditorium

Dr. Low studies resource control and reproductive success in vertebrates (including humans) from an evolutionary framework and a behavioral ecological approach. Her recent focus is on the evolutionary “oddity” of modern women's lives in developed nations. Her numerous peer-publications span fields of inquiry, including Evolutionary Psychology, Human Biology, Epidemiology, Demography, and Behavior Sciences. She is the author of the widely read and cited *Why Sex Matters: A Darwinian Look at Human Behavior*.
